

The Twelve New Labors of Hercules CS-24

Om Mani Padme Hum Om

In the name I AM THAT I AM, my beloved Holy Christ/Buddha Self and Holy Christ/Buddha Selves of all lightbearers throughout cosmos, we call to beloved Hercules and Amazonia to work with the human, angelic, elemental and nature kingdoms and their hierarchs and the four cosmic forces to manifest these labors into the physical, emotional, mental and etheric bodies of all life upon Earth.

1. A consciousness of Oneness prevails among all people across the planet, and all are raised up to live and love according to the golden rule. All are awakened to their highest nature, and peace prevails across the globe.
2. Ascended masters and the angelic realms; men, women and children; the elementals and Elohim all work together as they love, honor, respect, and collaborate with each other.
3. Pure food and water, clean earth and atmosphere, and all resources are available to everyone on the planet in abundance and used only for good. Energy sources in use across the globe are immaculately clean and available to everyone abundantly and freely. All waterways are pristine. Any shifts within the Earth's tectonic plates occur gently and harmoniously. Our physical bodies have returned to their original blueprint.
4. Beautiful music is playing continuously to raise up all people and all life into the virtues and joys of God. These harmonic vibrations permeate all the food sources, and the nutritional requirements of all species are met.
5. A new order of crystalline educational methods exists for children and youth at appropriate developmental stages so that

they can envision and outpicture their highest dreams and aspirations, bringing into reality divine concepts from the etheric realm.

6. Gems, minerals and gold are readily available and accessible for our use.

7. Truthful and enlightened leaders and governments righteously serve people throughout the world.

8. The financial system across the world now operates according to the love, truth and wisdom of the Golden Age. Everyone has equal access to resources and abundance.

9. Reverence and appreciation abound for every human life, including life in the womb. The reason for our embodiment on this planet is known across the Earth, and appreciation exists for every soul aborning at this cosmic hour. Every life is valued from the moment she is approved to incarnate on Earth.

10. Freedom to live in happiness and integrity exists for every creature upon Earth, including animals. Bees and pollinators perform their work in perfect health. All forms of life throughout the planet cooperate and live in perfect harmony.

11. All mankind are assisted and quickened to balance, raise and expand their threefold flames.

12. People awaken to the infinite spiritual and physical abundance radiating from our sun and connect with the Solar Presence within them.
