

## 156. Love Will Always Find Us

I knew you long before I met you;  
I loved you long before our first gaze  
And when I was in your arms the world stood still.  
Your laughter echos in my mem'ry;  
Your beauty dances in my mind's eye  
And when you are in my sight,  
All time stands still.

I'll love you ever more each day;  
I'll cherish you along life's way.  
Your spirit bides within me;  
Your presence glows around me.

Once upon a dream I met you;  
Long ago I knew your name.  
Visions from the past have shown me  
Sacred lands from whence we came.

Once upon a time I loved you;  
Long ago I knew your heart.  
Whispers from the past have found us;  
Now we'll make a fresh new start.

*Chorus*

**Love will always find us  
Through all time and space.  
Angels tend your coming,  
Blessed one of grace.**

*(Continued)*

Your eyes shine brighter than the clear sky;  
Your heart's fire warmer than the sunshine  
An aura of peace and grace surrounds your form.  
I'll always know that you are with me;  
I'll never turn the other way, dear.  
And though clouds may loom ahead I'll quell the storm.

*Interlude*

Once upon an ancient vista;  
Long before this present time  
Hand in hand we walked together;  
In that age of love sublime.

*Chorus*

**Love will always find us;  
Though the stars know when  
You're the one I've treasured;  
Time and time again.**

Once upon a time I loved you;  
Long ago I knew your heart.  
Echos from the past have found us;  
Now we'll make a fresh new start.

*Chorus*

**Love will always find us;  
Heart to heart we'll be  
Chosen for each other;  
Now at last we see!**

Heart to heart we'll be.  
Love will always find us!
